Whady Martínez

Mobile Developer
Valencia, Venezuela | +58 424 8689203 | martinez.whady@gmail.com
LinkedIn | GitHub

Professional Summary

Software Developer with over 5 years of experience specializing in cross-platform mobile and modern web application development, as well as advanced Artificial Intelligence integration. Highly skilled in Flutter and Dart for building scalable mobile architectures, alongside hands-on experience in mobile and web development using React (React Native / React.js) and Next.js. Robust backend expertise using Spring Boot, Python, Nest.js, Prisma, and Supabase, alongside relational database management (PostgreSQL, MySQL). Specialized in practical AI implementation (LLMs, agents, and API integrations), end-to-end publishing cycles on official app stores (Google Play Store, App Store), payment gateways, and transactional notification services.

Work Experience

Full Stack Developer | Amalia Salud

End-to-end development of comprehensive healthcare technology solutions combining cross-platform mobile frontend and backend architecture. Built advanced mobile applications with Flutter, integrated backend services and databases using Supabase, and developed core business logic and automation scripts using Python.

Programmer Analyst | Intelix

Development of new features, enhancements, and requirements for the Credix financial platform (Costa Rica).

Software Developer | AI & Advanced Integrations

- **Generative AI & LLM Integration:** Implementation and integration of LLM APIs (Gemini, Claude, OpenAI, AWS Bedrock) for building intelligent agents, conversational AI assistants, and Natural Language Processing (NLP) solutions aimed at workflow optimization and process automation.
- **AI Training & Simulation (Personal Project):** Designed and developed a training system for Reinforcement Learning models applied to adaptive traffic control at urban intersections using Python and the SUMO simulation environment.
- **Computer Vision & Real-Time Analytics (In Production):** Implemented a real-time foot-traffic monitoring and analytics system for shopping malls using Python scripts for data querying, metric processing, and analytical visualization.
- **Video Management Systems:** Integration and configuration of HikCentral for access

control and centralized video surveillance management.

Mobile & Web Developer | MVP Projects

- **Cross-Platform Mobile Development (Flutter & React):** Architecture, design, and implementation of high-performance cross-platform mobile applications using Flutter (utilizing robust state management patterns like Provider, BLoC, and GetX) and React / React Native. Optimized UI/UX interfaces, fluid animations, and native performance across iOS and Android.
- **Tennis Court (Venezuela):** Mobile application development for sports court booking and management using Firebase services and REST API integration.
- **TownSqur (Spain):** Participated in building a community platform for reservation management and voting, working from initial Figma prototyping to full deployment.
- **Store Publishing & Deployment:** Managed end-to-end build, signing, beta distribution, app store approval, and continuous deployment workflows for Google Play Store and Apple App Store.
- **Service & Payment Integrations:** Integration of payment gateways linked to Banco R4 banking services, transactional push notifications using WonderPush, and transactional email services with Resend.

Technical Skills

Mobile & Frontend Development

- **Flutter & Dart:** Mobile Architecture, Custom Widgets, Animations, REST APIs / WebSockets consumption.
- **Mobile State Management:** BLoC, Provider, GetX.
- **React Ecosystem:** React.js, React Native, Next.js.
- **Mobile Publishing:** Google Play Console, Apple App Store Connect, CI/CD pipelines.
- **Web Frontend:** Angular, HTML5, CSS3, JavaScript / TypeScript.

Artificial Intelligence & Machine Learning

- LLMs & API Integration (Gemini, Claude, OpenAI, Bedrock)
- AI Agents & Advanced Prompt Engineering
- Reinforcement Learning
- Python for AI (Scripting, Data Processing & SUMO Simulator)

Backend & Tools

- Nest.js, Prisma ORM
- Spring Boot, Node.js, Supabase
- RESTful APIs & Webhooks

Integrations & Third-Party Services

- Banco R4 Payment Gateway

- WonderPush (Push Notifications)
- Resend (Transactional Messaging & Email)
- HikCentral (Access Control & Video Management)

Databases

- PostgreSQL, MySQL, Firestore

Methodologies & DevOps

- Scrum (Jira, Confluence, Slack, ClickUp)
- Figma (UI/UX Design), Git, GitLab CI/CD

Education

- **B.S. in Electronics Engineering** - Universidad José Antonio Páez, San Diego, Carabobo, Venezuela.
- **Diploma in Mechatronics** - Universidad José Antonio Páez, San Diego, Carabobo, Venezuela.

Languages: Advanced English | **Interests:** Livestock farming & Agriculture
